## WIRING DIAGRAM FOR TW

For more detailed information, please refer to the specifically used LED driver's documentation.

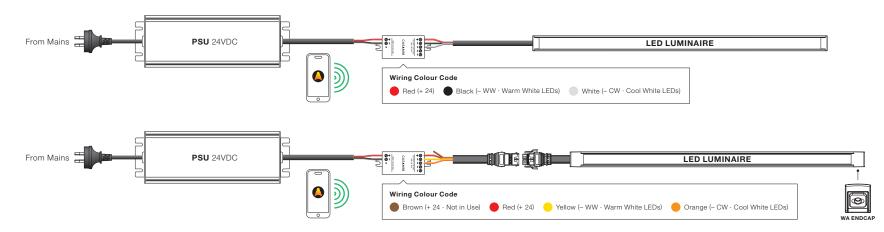

#### With DRV-LN200D-D2Z2C / D2Z2D

eldoLED LINEARdrive 8A DALI DT8 Full-Colour Dimmable LED Driver / 8A DALI DT6 Full-Colour Dimmable LED Driver

#### With CAS-CBU-PWM4

Casambi Bluetooth Controllable 4 Channel PWM Dimmer

## WIRING DIAGRAM FOR RGBW

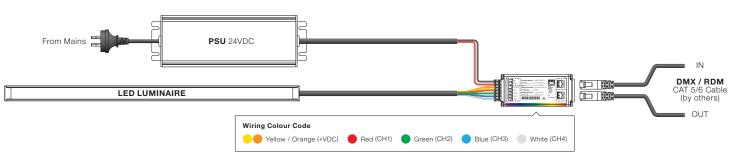

FEMALE RJ45

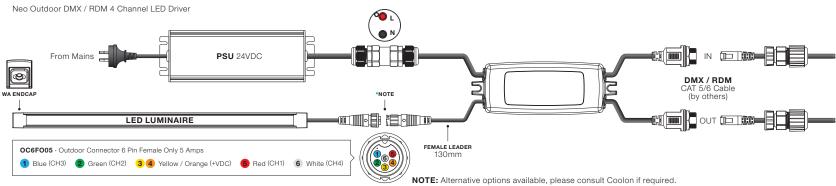

For more detailed information, please refer to the specifically used LED driver's documentation.

#### With DRV-RDM-P4

DMX / RDM 4 Channel LED Driver

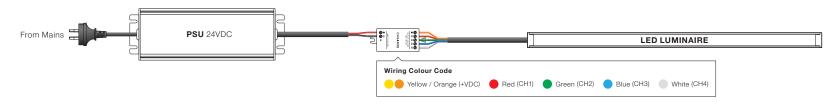

#### With DRV-RDM CV NEO-RJ45F-OC6F005-IP65

#### With CAS-CBU-PWM4

Casambi Bluetooth Controllable 4 Channel PWM Dimmer

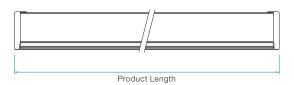

## STEP 1

Before you begin installation, ensure that you understand the fitting layout required as supplied lengths may vary.

Refer to the supplied cut sheet for length breakdowns.

\* For fittings 1m or longer two installers are recommended.

## WIRING

If the fitting is wired from the back: It will need to wired before mounting.

If the fitting is wired from the side: It will need to wired after mounting.

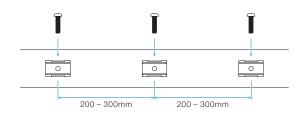

Wire the fitting to the correct power supply as advised on the cut sheet.

## STAINLESS STEEL C-CLIP

STEP 2

Prepare mounting clips and screws (Ø3.5mm).

Secure mounting clips with screws on timber or metal surface ensuring that mounting clips are positioned screw side up with spacings of 200 – 300mm.

## • STEP 3

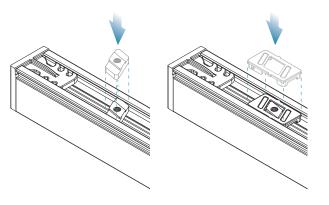

Lay the luminaire on top of the clips and align so all clips are centred. Starting at one end push down the fitting until you hear the clip lock into place. Continue along the profile until all clips are locked.

## ROTATING BRACKET TYPE A & TYPE B • STEP 2

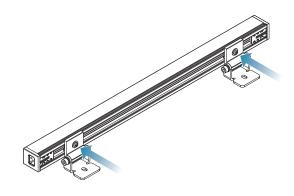

Place rhomb nut in the base of the extrusion of the luminaire, ensuring that the edges of the nut are parallel with the edges of the extrusion.

Next place the plastic aligning clip over the rhomb nut.

## • STEP 3

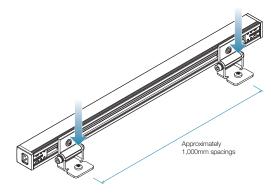

Place the edge of the bracket (with the slight lip) over the extrusion and secure the bracket to the rhomb nut using the screw provided.

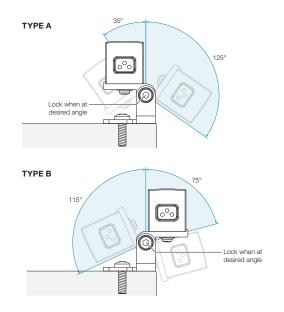

## STEP 4

Prepare screws (Ø4mm). Secure the other side of the bracket with screws on timber or metal surface ensuring that mounting clips are straight with spacings of 1,000mm.

## STEP 5

Rotate the fitting to the desired angle and use Allen key provided to tighten bracket to secure in place.

## STEP 6

Wire the fitting to the correct power supply as advised on the cut sheet.

\* Typically supplied with AU flex and plug (1.8m long)
