

 COOLON

CP34

140W LED Flood Light

High performing, mains-powered LED flood light with remote power supply

CP34 is ideally suited for most situations where bulb maintenance is difficult. Its power supply unit can be positioned separately for easy maintenance.

Designed and manufactured in Australia using only the highest quality components, the CP34 LED Luminaire is designed specifically for industrial applications where reliability and performance are paramount.

Designed for use in:

- Area Lighting
- Car Parks
- Processing Plants
- ROM Pads
- Wash Pads
- Workshops
- Load In / Out

Raw power for the harshest environments

The CP34 is a 140W LED Flood light designed for the harshest environments and provides unrivaled reliability and performance, critical for demanding applications.

Built to last

Unlike conventional LED floodlights, the CP34 was designed to withstand constant abuse.

- Resistant to Vibration
- Impact and Shock Proof
- High Pressure Washable
- Unaffected by Severe Temperature Variations

COOL SURFACE TEMPERATURE

Coolon's Industrial LED fittings have a much lower surface temperature than traditional HID equivalents which prevents dirt from baking onto the luminaire. This allows for easier cleaning and will prolong the lifespan of the luminaire.

INSTANT ON/OFF

LEDs do not require warm up. Instant on to 100% output translates to no downtime, improved safety and the ability to utilize sensor switching to significantly save energy.

NO FLICKERING

LED luminaires run on constant low voltage DC power and do not produce any visible stroboscopic effects, thus reducing the strain on eyes and significantly improving safety in areas where moving machinery is present.

IP66

HIGH IP RATING - IP66

Coolon's Industrial LEDs are designed specifically to withstand the harsh conditions in mining environments. The robust design allows our LED products to be used in many different applications and are high pressure washable.

UNRESTRICTED BURNING POSITION

Coolon's LED luminaires can be positioned and oriented in any desired way without affecting the lifespan of the product. This gives greater flexibility when it comes to aiming angles and orientation.

EXTRA LOW VOLTAGE OPERATION

Our products operate on extra low voltage DC power. It is substantially safer to work with than conventional mains powered light sources.
