**INSTALLATION INSTRUCTIONS**

**Step 1**
Remove the old fitting from the pole leaving the existing cable.

**Step 2**
Loosen the six captive screws on the bottom of the DLK2 to remove cover.

*NOTE:* Do not remove captive screws from cover plate.

**Step 3**
Feed the cable through the cable gland while sliding the DLK2 to the spigot. Secure using U-Bolts with washers and Nylock nuts.

**Conductor Requirements**

<table>
<thead>
<tr>
<th>Conductor Size</th>
<th>AWG</th>
<th>Strip Length</th>
<th>Cable OD Min/Max</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.5 – 6mm²</td>
<td>20 – 10</td>
<td>11 – 12mm</td>
<td>7mm/13mm</td>
</tr>
</tbody>
</table>

*NOTE:* Housing is earthed internally.

24mm wrench required for tightening the cable gland.

---

371mm 393mm 169mm
After mounting DLK2 to the spigot and wiring is complete, refit the bottom cover to finish installation.

GLAND REPLACEMENT

The fitting is supplied with a stainless steel M20 gland to suit cable outer diameter 7 – 13mm. Cable glands are secured using Loctite 222.

The cable gland can be replaced by other types of glands which have a M20 x 1.5mm mounting thread. We recommend Loctite 277 for a permanent bond.
